Yongwan Lim

CONTACT **Cell**: 213-479-5015 **Email**: yongwanl@usc.edu **Web**: yongwanlim.github.io

PROFESSIONAL SUMMARY

- New PhD graduate with expertise in Magnetic Resonance Imaging (MRI), Signal and Image Processing, Medical Imaging, Machine (Deep) Learning;
- MRI expert with 7+ years of research experience and an established record of a clear scientific contribution in the field of real-time MRI;
- Experienced in operating MRI scanner (7+ years) and collecting and processing morphological and dynamic MRI data;
- Proficient in MATLAB, Python, C/C++;
- Excellent technical communication skills; a great interdisciplinary collaborator;

EDUCATION

Ph.D., Electrical and Computer Engineering, Computer Science (minor) Dec 2020
University of Southern California (USC), Los Angeles, CA, USA
- Thesis: *Improved real-time MRI of speech production*
- Advisors: Krishna S. Nayak, Ph.D. and Shrikanth S. Narayanan, Ph.D.
- GPA: 3.79/4

M.S., Electrical Engineering, Feb 2014
Korea Advanced Institute of Science and Technology (KAIST), Daejeon, Korea
- Thesis: *Free-breathing abdominal MR imaging for reduction of respiratory motion artifacts*
- Advisor: HyunWook Park, Ph.D.
- GPA: 4.26/4.3

B.S., Electrical Engineering, Feb 2012
Sogang University, Seoul, Korea
- GPA: 3.88/4.3 (Major: 4.19/4.3), *Summa Cum Laude*

RESEARCH EXPERIENCE

Graduate Research Assistant Aug 2015–Present
Magnetic Resonance Engineering Lab and Signal Analysis and Interpretation Lab, USC
Advisors: Krishna S. Nayak, Ph.D. and Shrikanth S. Narayanan, Ph.D.

Computational Imaging Techniques in Real-Time MRI
- Implemented reconstruction algorithms for real-time MRI, based on sparse signal model, hardware limitation, and MR physics in Matlab and Python; Accomplished 6-7× acceleration in imaging by reconstructing highly under-sampled data.
- Investigated self-supervised reconstruction using convolutional and recurrent neural networks for real-time MRI.

An Open Speech MRI Dataset
- Initiate and lead project for machine learning applications; facilitate open-source developing and new technology incubation for data-driven methods in dynamic MRI.
- Serve as an MRI technician for collecting and processing morphological and functional speech MRI data from 72+ subjects (100+ hours) for various linguistic studies.
- Conduct curation of a large data corpus including pre- and post-processing, technical validation, anonymization, and preparation for code and data repository.
- Explore self-supervised representation learning techniques for speech MRI via video alignment task; facilitate speech scientific questions such as inter- and intra-speaker variability.

Deblurring for Real-Time MRI
- Developed a model-based image deblurring algorithm.
- Invented data-driven deblurring algorithms based on a model-based data generation, convolutional neural networks and attention mechanism; attained scan time efficiency (2×) with comparable image quality.

3D Real-Time MRI for Speech Production
- Led technical development in a cross-functional team of linguists, audio engineers, and MRI scientists.

- Achieved a 3D real-time imaging for speech production; enabled visualizing moving vocal organs during natural speech at 14 fps (13× acceleration).
- Invented a novel MR sequence and reconstruction pipeline based on MR hardware limits and an inherent tradeoff among spatial coverage and temporal resolution.

Research Intern Jul 2018
Samsung Fire & Marine Insurance, Seoul, Korea
- Constructed a deep learning method for document classification.

Research Intern Jun 2014–Jun 2015
Image Media Research Center, Korea Institute of Science and Technology (KIST), Seoul, Korea
Advisor: Jaein Hwang, Ph.D.
- Developed a sensor fusion algorithm to imporve computer vision failure case in 3D tracking for augmented reality system with smartphones.

Graduate Research Assistant Feb 2012–Feb 2014
Image Computing System Lab, KAIST, Daejeon, Korea
Advisor: HyunWook Park, Ph.D.
- Reduced respiratory motion artifacts in abdominal MRI by implementing efficient data acquisition and reconstruction methods.

Undergraduate Research Assistant Jun 2011–Jan 2012
Image Processing Lab, Sogang University, Seoul, Korea
Advisor: Rae-Hong Park, Ph.D.
- Built a 3D environment reconstruction method using the Kinect sensor and its visualization via tracking head position from a webcam.

Teaching Experience

Lecture Courses

EE 591 - Magnetic Resonance Imaging and Reconstruction, Guest Lecturer, USC Spring 2019
- Delivered a 2-hours lecture about Nyquist sampling theory

HSS189 - EE Freshmen Seminar, Teaching Assistant, KAIST Spring 2013
- Prepared and delivered lectures for a large introductory lecture class

Mentoring
- Advised one undergraduate student and five graduate students on independent research projects 2015–Present

Awards

Travel Awards

- ISMRM Educational Stipend Award 2017–2019
- Travel Grant, Graduate Student Government, USC 2016–2018

Student Awards

- ISMRM Magna Cum Laude Merit Award (top 15% of 4886 abstracts) 2020
- Ming Hsieh Institute PhD Scholar Finalist, USC 2019
- Best Paper Award, 25th Korea Signal Processing Conference Sep 2012
- Golden Medal Award of the Academic Competition, Sogang University Nov 2011
- Merit-based Scholarship (top 15 of 1500), Sogang University 2009–2011

Other Experience

Reviewer

- Magnetic Resonance in Medicine 2020
- Journal of Speech, Language, and Hearing Research 2020
- IEEE International Symposium on Biomedical Imaging 2020
- ISMRM Annual Conference 2019
- Precision and Future Medicine 2018

Military Service

- Sergeant (Administrative Specialist) Jan 2007–Jan 2009
  The Army of Republic of Korea, Choongju, Korea

Software Skills

Tools and Programming:

- Fluent: Python, MATLAB, Bash, LaTeX, Git
- Prior experience: C/C++, Siemens IDEA/ICE, Java

Languages

Korean and English
